

Summer Reading Words

Learn these words over the summer...

Hello there! Summer is upon us and along with having a lot of fun, your child needs to keep strong academically, too! Please have your child memorize the following sight words during the summer. Just put them on unlined note cards and put a rubber band around them. Show your child one word the first day. The next day, review that one word and add just one more word. The third day, review the two previous words and add just one more. Continue to do this each day (review old words and add just one new word).

It is an easy way to do it. Once your child has learned all of the words, review the flash cards about twice a week by using them with a game. This way, when school starts, the sight words will be easy for him/her.

The children will be tested on these words during the first full week of school. Thanks!

The power of learning!

-
- ☺ They do not need to know how to spell these words. They just need to be able to read them quickly.
